Details: Western DataCom will be demonstrating their secure **Moblie Ad Hoc Networking (MANET)** technologies for the US Army National Automotive Center/TARDEC located in Warren, MI. This live demonstration is to show users in military and regular vehicles wirelessly communicating with Voice, Video and Data while on the move or on the halt (parked). The purpose of this demostration is to test MANET applications for future intergration into military and First Responder emergency vehicles.

Vehicles will be equipped with TEAMLINC MANET to form a voice, video and data network. One vehicle out of four will be connected to the Internet by Sprint's 3G cellular network

A detailed agenda for is demostration will be available in July along with a registration form on our web site at www.western-data.com
