- Measures 8" x 5" x 6" weighs 7lbs.

The ComCase® M is a fully integrated Cisco Mobile Access Router in a rugged extruded aluminum enclosure with vibration dampening mounts. It includes all the components necessary to operate a mobile IP based application.

The ComCase® M is available with an integrated cellular modem that is capable of operating on Verizon, Sprint, Cingular and T Mobile nationwide networks. In addition, it can be configured with the Western DataCom IPE-10M/H for secure mobile communications using 256-bit AES counter mode encryption.

The onboard power supply accepts 9 to 32V DC in through a MIL-STD connector. Included with the ComCase M is a AC/DC power supply, as well as an automotive adapter for vehicle applications.

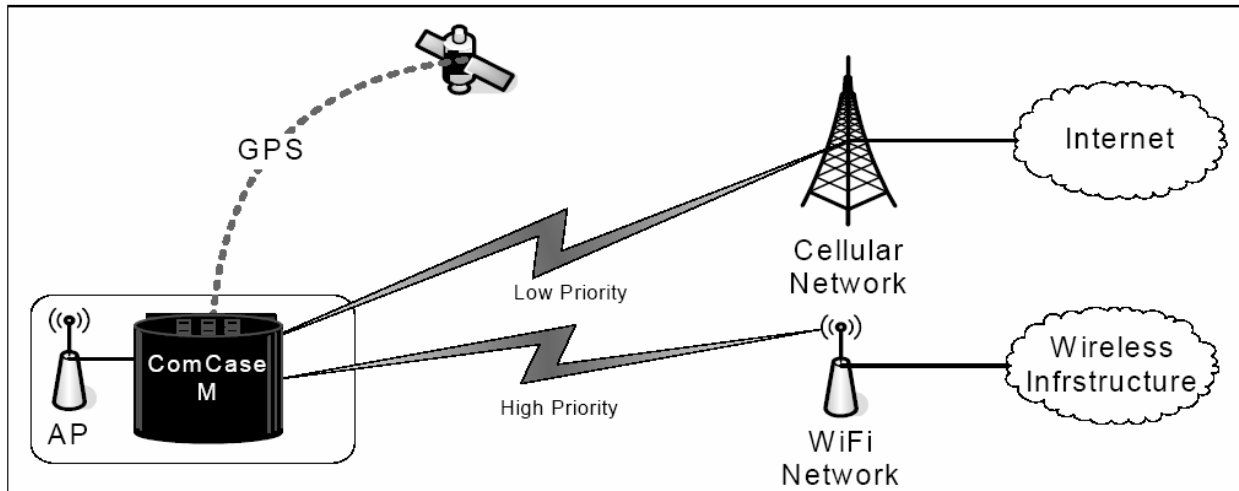

Western DataCom is a premier Advanced Technology Partner for the Cisco Mobile Access Router and provides completely operational units out of the box using its public Home Agent. Enhanced support options are also available with the ComCase® M
